

OVERCOME OBSTACLES

Feel free: New Dacia Duster takes you wherever you want to go with complete peace of mind. With its robust chassis, high ground clearance and off-road capabilities (in the 4-wheel drive version), it makes light work of rough terrain and uneven surfaces. Hill Start Assist allows you to tackle the steepest of slopes; adaptive Hill Descent Control* prevents skidding by controlling the speed of your SUV. The 4x4

Monitor feature with built-in compass and altimeter makes sure you always have the right information at the right time. Adjust the knob*, switch from traction to four-wheel drive and enjoy your adventure playground!

*On 4x4 versions.
